

Hound Security

Always on guard

Add video surveillance, anywhere
The BatteryCam and SolarPanel

Quick and easy to install

**Indoor and outdoor video monitoring
the Smart way**

Indoor and outdoor video monitoring – the Smart way

Real-time notifications

Wide-angle view 130°

Motion Detection

The BatteryCam's wireless design allows it to be placed wherever it's required and moved whenever it's needed.

With 130° wide-angle view, motion detection, real-time notifications and push-to-talk function, users are always connected to home with the BatteryCam.

The BatteryCam also connects with our SolarPanel for continuous charge, and adding our 32GB SD Card allows users to record up to a few thousand one minute video clips in local storage!
