HomeControl2.0

Extending the capabilities of security control.

Providing security with the next level of smart device application, HomeControl2.0 delivers the ultimate peace of mind that your property is secure.

Featuring geofence arming and disarming alerts, enhanced biometric login, push notifications and intuitive status viewing and control options, this brand-new interface is the only one you'll need. Make your security a dream, with HomeControl2.0.

Geofence
alerts for easy reminders

Configurable to a distance of 50m to 1000m of the property, you'll receive a push notification reminder via HomeControl2.0 to arm and/or disarm your system as you enter or exit the configured geofence area respectively.

Voice push notifications

Receive audible voice push notifications directly to your device; letting you know exactly what's happening so that appropriate action can be taken. If someone's crossed the perimeter, the 'perimeter breached' notification will be received as an early warning of an intruder, before they can even get close to your property.

Arm and disarm

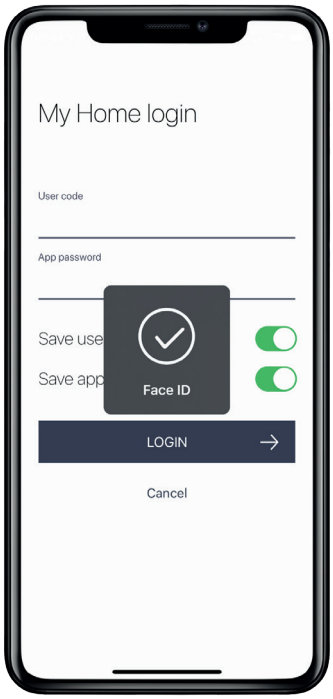
Individually arm and disarm zones to secure your property, or to allow access. This can be for the entire property or specific zones, should you want to allow a pet to roam freely in a residential setting, or keep a store room or office space armed in a more commercial environment.

Great new look and feel

HomeControl2.0 is a brand-new platform that puts you at its very heart, with a newly designed interface that makes controlling and managing your complete alarm system fast and easy.

Remote reassurance

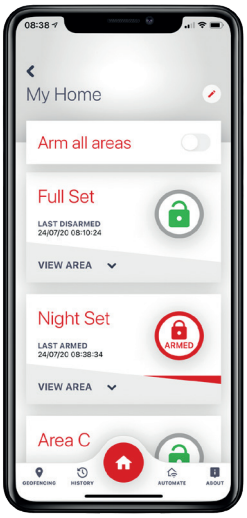
Easily and quickly check and control the entire status of your security system from one place, wherever you are.



Biometric login

(FaceID/Touch ID (iOS) and Android equivalents)

Logging into the system has never been easier or simpler with biometric login (facial recognition/fingerprint) available on both iOS and Android. With HomeControl2.0 there's no need to enter your user code every time you open the app.



Simple and intuitive to use

With HomeControl2.0 you can view all zone and sensor status' from one screen, so they're in the right place right away; providing you with the information you need to take action as quickly as possible.

Wide range of peripherals

The security system can be tailored to meet your property's exact needs, with external detectors, internal detectors, life safety sensors, outdoor sirens and much more available. With HomeControl2.0 you're controlling the perfect system for your property.
